

## PRESS RELEASE

# ANDRITZ wins order for supply of HERB recovery boiler to Moorim P&P, South Korea

*GRAZ, AUGUST 24, 2023.* International technology group ANDRITZ has received an order for a new HERB recovery boiler including advanced digitalization solutions to be installed at Moorim P&P's pulp and paper mill in Ulsan, South Korea. The delivery will increase the economic and environmental sustainability of the mill's operations.

The contract signed with power plant supplier SGC eTEC E&C includes the engineering and main equipment supply for the boiler, digitalization solutions (ANDRITZ autonomous recovery boiler solutions) for maximum use of the boiler's potential, and an ash treatment system.

Replacing two existing boiler units, the new HERB boiler will enable more efficient chemical recovery from the black liquor at lower emissions. Together with a new steam turbine, it will also significantly increase the mill's renewable energy production. Thus, the delivery will make mill operations more self-sufficient, economical and sustainable. HERB recovery boilers are part of ANDRITZ's broad portfolio of sustainable products that the company keeps advancing and expanding.

This order is a result of a long-lasting cooperation – ANDRITZ has provided process upgrades to Moorim P&P's boilers for several years. "Our collaboration with ANDRITZ has already brought valuable continuous improvements to our Ulsan mill," says Kim Sangwoo, Executive Director, Moorim P&P.

"This order is taking our relationship with Moorim P&P to the next level. We at ANDRITZ are grateful for the trust placed in our team and our technology," said Henrik Wikstedt, Vice President, Recovery Boilers at ANDRITZ.

Moorim P&P's Ulsan mill produces bleached kraft pulp and different types of high-quality paper. Established in 2011, it is Korea's first and only integrated pulp and paper mill.

## **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 29,900 employees and over 280 locations in more than 40 countries.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
