Suzano entrusts ANDRITZ with maintenance for new pulp mill

GRAZ, NOVEMBER 20, 2023. Brazilian pulp producer Suzano selected international technology group ANDRITZ to provide modular maintenance services for its new mill being built in Ribas do Rio Pardo, state of Mato Grosso do Sul, Brazil.

The five-year contract covers several maintenance modules for all process islands and equipment of the new mill, which is scheduled to start up by June 2024. The modules comprise lubrication as well as predictive and inspection maintenance services, including vibration and thermographic analysis of electrical and mechanical equipment.

With an annual production capacity of 2.55 million tons, the new Suzano mill will be the world's largest plant with a single eucalyptus production line. ANDRITZ is supplying the main equipment and services for this project.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 30,000 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
