

PRESS RELEASE

ANDRITZ starts up largest high-kappa fiberline in China for Nanning Sun Paper

GRAZ, DECEMBER 4, 2023. International technology group ANDRITZ has started up a state-of-the-art, highly efficient fiberline and lime kiln plant at Nanning Sun Paper's pulp and paper mill in Nanning, Guangxi Province, China.

Zang Zijia, Project Director, Nanning Sun Paper, said, "Start-up of the fiberline and lime kiln went very smoothly. The project progressed quickly, the start-up test was completed within one month after feeding, and now the equipment is running stably. We will definitely continue working with ANDRITZ in the future to further increase our capacity and efficiency."

The ANDRITZ supply was on full EPS (Engineering, Procurement, Supervision) basis and included the following:

- The largest **high-kappa fiberline** in China with a capacity of 1,600 adt/d. The hardwood line includes a TurboFeed chip feeding system, Lo-Solids continuous cooking, blow line refiners, screen room, LC refiners and highly efficient washing with a multi-stage DD-Washer drum displacer washer, a GF-Filter advanced vacuum drum filter washer and a COMPACT PRESS wash press.
- An energy-efficient **lime kiln plant** with a capacity of 450 t/d burnt lime, including a LimeDry lime mud washing and dewatering filter, a LimeKiln feeding system, a LimeKiln shell, riding rings, roller sets and driving mechanism, as well as a LimeCool and a LimeFire burner.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 30,000 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
