

PULP & PAPER

REDUCED PLUGGING, INCREASED PRODUCTIVITY

SUREFEED™

OVERVIEW

Mills operating their presses with old feed technology of tapered or square headboxes face high probability of pulp plugging issues. This plugging decreases productivity

and efficiency of the press, while increasing operating and maintenance costs. The ANDRITZ Surefeed™* upgrade offers state-of-the-art technology that minimizes

pulp plugging and optimizes the pulp feed flow to the press. This solution will increase availability as well as washing efficiency of the twin roll press.

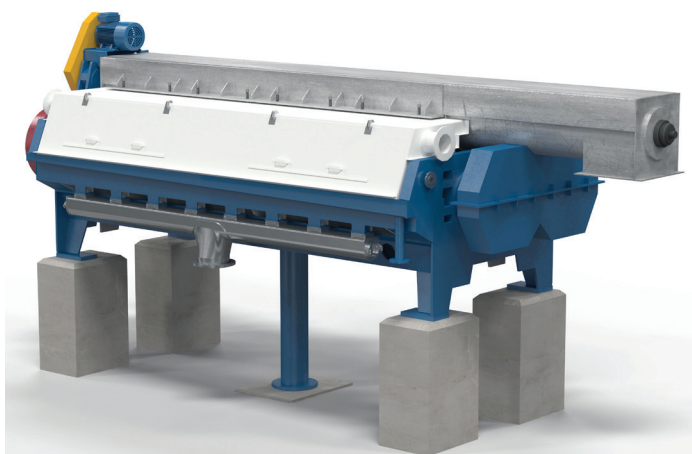

ANDRITZ

ENGINEERED SUCCESS

Improved stability and pulp distribution

KEY TO SUCCESS

SureFeed technology is a simple solution that allows increased feeding consistency. SureFeed offers reliable and optimized pulp distribution to the wash press, feeding with higher consistency and increasing capacity. The solution reduces maintenance costs caused from pulp plugging in inlet header and press vat, offering a low cost upgrade and short return on investment.

Wash press SureFeed 3D

MILL DATA FROM SUREFEED UPGRADE

BENEFITS

- Reduces plugging
- Reduces maintenance costs
- Increases productivity
- Reliable solution for wash press
- Pulp distribution optimization with Mid-Feed

		Before	After
Feed Consistency	%	3-4	> 5,5
Feedbox Plugging		Yes	No
Stock Recirculation	%	10	0
The availability is improved +20h/year
