

SHARPEN YOUR EDGE WITH ASKOedge ASKO knives

ASKOEDGE™

ASKOedge™ is a cutting-edge software program for slitting clearance control. It can handle any coil processing operation, even with advanced high-strength steels, and it is easy to learn in hours. ASKOedge™ enhances the quality of the slit edge for packed slitter arbors, makes the set-up process easier, and guarantees consistent set-up precision and efficiency. ASKOedge™ helps users set the best

clearance between the slitting knives and the strip edge. By using ASKOedge™, users can lower burr formation, enhance strip edge quality, and prolong the life of the slitting knives. ASKOedge™ works by finding the best knife clearance based on the material properties, thickness, and width of the coil. A great benefit of ANDRITZ and a better adaptation for the customer is through the support hours. ANDRITZ

offers remote support hours for online startup, process and software training, and Subject Matter Expert (SME) interactions. ANDRITZ also offers on-site startup assistance that covers one day of in-plant service with operator training on how to use ASKOedge™. ANDRITZ enhances this benefit through the subscription pricing plan that incorporates the remote support hours.

ANDRITZ

Options and service

ASKOedge™ has several options to adapt to the requirements of your slitting operation and that will offer your company significant benefits.

PLANT BENEFITS

- Increased productivity
- Extended knife life
- Simplified knife management program
- Export knife management data to excel
- Eliminate lost production time due to setup calculation errors
- Customize software to fit special slitting practices
- Improved coil yield

OPERATOR BENEFITS

- Reduce on-boarding time for new operators
- Enter multiple setups at one time
- Save setup and take-down time
- View all stripper ring ranges at one time
- Add foot notes to printed setup pages
- Configuration Wizard to help with initial setup and adjustments
- Adapt and compensate for variables within the slitting line
- Create misalignment setup to easily measure misalignment

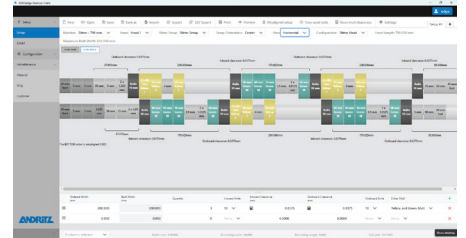

QUALITY AND END CUSTOMER BENEFITS

- Consistently accurate mult widths with minimum burr
- Document actual mult widths and edge condition to replace guesswork
- Ability to classify, track and predict edge condition
- Statistical reports to help you track and add customer requirements
- Continuous improvement of your slitting practices

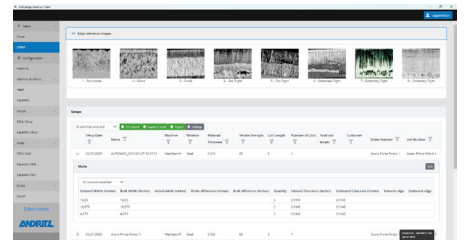

SERVICE BENEFITS

ANDRITZ offers online startup assistance with operator training on how to use of ASKOedge™. Remote support hours can also be used for additional needs such as process training, software training and Subject Matter Expert (SME) interactions. ANDRITZ also offers remote support hours for additional on-demand support requirements.
