

PRESS RELEASE

ANDRITZ to supply waste-to-energy line to La Réunion

GRAZ, JULY 11, 2024. International technology group ANDRITZ has received an order from the French energy company Albioma to supply a waste-to-energy line for its Bois-Rouge power plant on the island of La Réunion.

The new boiler line from ANDRITZ will have the capacity to treat 70,000 tons of high calorific waste per year. It will convert solid recovered fuel from household waste into energy, thus supporting the island's efforts to end landfilling and increase energy autonomy.

Pascal Langeron, Director of Albioma Indian Ocean, said: *“Our new line will enable us to use solid recovered fuel from a nearby waste sorting facility to generate electricity. This will divert waste from landfills and conserve fossil fuels, contributing to decarbonization and a more circular economy. It also makes the region more energy self-sufficient. We look forward to working with the highly experienced ANDRITZ team to implement this strategic project.”*

ANDRITZ's scope of supply includes the engineering and manufacture of a boiler with a thermal fuel input of 41.67 MW based on its FlexSol grate combustion system. ANDRITZ will also be responsible for the commissioning. The new line is scheduled to be operational by the end of 2026. It will replace some of the imported fuel used for power generation at the Bois-Rouge plant.

Albioma is a renewable energy producer headquartered in Paris, France, with operations in Overseas France, Metropolitan France, Mauritius, Brazil, Canada, Australia and Türkiye. The company is committed to supporting the energy transition by harnessing biomass, solar and geothermal energy.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydropower and Environment & Energy. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 30,000 employees and over 280 locations in more than 80 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
