

## PRESS RELEASE

# ANDRITZ acquires recycling technology specialist ATN Engineering

**GRAZ, JANUARY 24, 2025.** International technology group ANDRITZ has acquired ATN Engineering B.V., a Dutch company specializing in advanced recycling technologies. This strategic acquisition strengthens ANDRITZ's position as a global leader in recycling solutions by adding ATN's state-of-the-art degassing and de-oiling systems to its portfolio.

ATN Engineering is recognized as an innovator in the recycling sector with its unique drill head system, which enables the safe and efficient removal of hazardous oil and gas from end-of-life refrigerators. The company also supplies feeding logistics and equipment for the recycling of industrial coolers, air conditioning equipment, and heat pumps. ATN provides engineering, manufacturing, installation, commissioning and servicing of recycling equipment. To date, the company has delivered more than 200 degassing units worldwide.

Thomas Gemeiner, Vice President, Recycling at ANDRITZ commented: *"This acquisition is another significant step forward for our recycling offering. By integrating ATN Engineering's expertise and proprietary technology, we now cover all critical process steps in refrigerator recycling from a single source. This strengthens our leading position in the area and our ability to provide our customers with comprehensive turnkey solutions. We are very pleased to welcome the ATN team to our group."*

With this acquisition, ANDRITZ not only expands its technology portfolio but also underscores its commitment to advancing the circular economy through innovative, sustainable solutions. In addition to refrigerator recycling, the ANDRITZ Recycling team focuses on key growth areas such as e-scrap recycling, battery recycling, and waste-to-energy systems.

#### **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydropower and Environment & Energy. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 30,000 employees and over 280 locations in more than 80 countries.

#### **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
