ANDRITZ successfully completes biomass power plant project in Hungary

GRAZ, MARCH 19, 2025. International technology group ANDRITZ has handed over a state-of-the-art biomass power plant to Hungrana, Hungary's leading sugar producer. The new plant marks a significant milestone in Hungrana's efforts for increase sustainability and production efficiency.

ANDRITZ supplied the plant on a turnkey basis, from design and manufacture to erection of the boiler and related equipment, including associated civil works.

Now fully operational, the modern plant enhances Hungrana's ability to produce steam from renewable resources, reducing its reliance on gas. It has the capacity to generate 32 tons of steam per hour at 12 bar(g) and 220°C using wood chips as fuel.

"We are very pleased with the timely completion of this project and the high quality of the work provided by ANDRITZ," said Zoltán Reng, CEO of Hungrana. "The entire process, from initial design to final commissioning, was handled with great efficiency and professionalism. This new biomass power plant underscores our commitment to sustainability. We are proud of the positive impact it will have on both our business and the environment."

The successful implementation of this project strengthens Hungrana's position as an industry leader offering high-quality products while reducing its carbon footprint. It also highlights the expertise and reliability of ANDRITZ in delivering solutions for sustainable energy production that contribute to global environmental goals.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
