Turkuvaz improves diaper production with an ANDRITZ upgrade to the fastening process

GRAZ, APRIL 04, 2025. International technology group ANDRITZ has completed a service retrofit for the Turkish company Turkuvaz at its Sakarya plant, modernizing the diaper fastening tape system. This will improve the production process of the converting line and the quality of the diapers.

The modernization of the diaper fastening tape system ensures a strong, reliable bond on the diaper closure and facilitates the converting process. The improvement in raw material tension results in reduced downtime, increased productivity and significant cost savings. Raw material costs are drastically reduced compared to conventional side tape solutions.

Sedat Mala, General Manager of Turkuvaz, said: “ANDRITZ completed this major retrofit in a remarkably short time of just two weeks, demonstrating its ability to deliver fast and impactful solutions.”

Turkuvaz already operates nine converting lines and one spunlace line from ANDRITZ, which underlines the company’s confidence in ANDRITZ as a reliable and innovative partner.

Turkuvaz is a member of the retail company BIM, which owns 11,000 stores across Türkiye.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
