

## PRESS RELEASE

# Greener Türkiye: ANDRITZ to supply equipment for Incir hydropower plant

*GRAZ/VIENNA, 20 MAY, 2025.* International technology group ANDRITZ has secured a significant order from Limak Enerji Üretim Sanayi ve Ticaret A.Ş., a subsidiary of Limak Renewable Energy, to supply electromechanical equipment for the new Incir hydropower plant in Türkiye. The order has a value in the mid-double-digit million-euro range.

The turnkey “from water-to-wire” contract encompasses the engineering, manufacturing, supply, installation, and commissioning of two Francis turbine-generator sets including electromechanical equipment and an ECO-flow unit with a total installed plant capacity of 124 MW.

The project owner, Limak Renewable Energy, is one of Türkiye’s leading pure renewable energy companies, with a strong commitment to expanding the country’s renewable energy capacity. The Incir project supports Türkiye’s renewable energy strategy: The country has the largest installed hydropower capacity in Europe after Norway. With more projects presently in development, Türkiye is set to become the leading European country in clean energy, significantly contributing to a carbon-free future. Renewables account for 69 GW or 60% of the country’s total installed capacity of 118 GW.

The turbine model, which has been extensively tested in ANDRITZ’s own hydraulic laboratory, features one of the most efficient runner designs available. With a maximum head of 135 meters and a rated speed of 300 rpm, each turbine will have a maximum output of about 57 MW, while the ECO-flow unit will contribute an additional 10 MW.

With this contract, ANDRITZ further strengthens its role in Türkiye’s green transition and deepens its long-standing partnership with Limak Renewable Energy. The order marks the culmination of more than 20 years of successful cooperation between the two companies.

## **ANDRITZ GROUP**

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

## **ANDRITZ HYDROPOWER**

ANDRITZ Hydropower is one of the world's leading suppliers of electromechanical equipment and services for hydropower stations in the dynamically growing global renewable energy market. Based on 185 years of experience and a global installed capacity of 489 gigawatts, we offer innovative solutions for new and existing hydropower stations, from small hydropower to large-scale plants. State-of-the-art digital solutions, comprehensive services for the operation and maintenance of entire hydropower plants, and turbo generators for the thermal industry complete the portfolio.
