

ANDRITZ SAWBLADE FOR PowerHeads

Tropical and sub-tropical conditions

This advanced sawblade for ANDRITZ PowerHeads is suitable for softwood with high grain rise or other applications where more clearance between the sawblade and the log is needed. High tolerances and superior materials enable high feed speeds and longer running hours.

FEATURES

- Optimized steel selection for the blade body to maximize strength capabilities
- Tip material selected for tropical and sub-tropical conditions to ensure the best performance
- Optimized blade gullet for optimal material flow

ANDRITZ sawblade installed on a PowerHead canter head

YOUR BENEFITS

- High feed speeds
- Longer running hours
- Superior surface quality
- Optimal material flow
- Optimized features for tropical and sub-tropical conditions
