

ANDRITZ SAWBLADE FOR PowerHeads

Polar and sub-polar conditions

The new advanced sawblade for ANDRITZ PowerHeads is suitable for softwood with small grain rise and similar applications. High tolerances and superior materials enable high feed speeds and longer running hours.

FEATURES

- Optimized steel selection for the blade body to maximize strength capabilities
- Tip material selected for polar and sub-polar conditions to ensure the best performance
- Optimized blade gullet for optimal material flow

ANDRITZ sawblade installed on a PowerHead canter head

YOUR BENEFITS

- High feed speeds
- Longer running hours
- Superior surface quality
- Optimal material flow
- Optimized features for polar and sub-polar conditions
