

## PRESS RELEASE

# ANDRITZ receives order from Adani Green Energy for 1500 MW pumped storage project in India

*GRAZ/VIENNA, JUNE 17, 2025.* International technology group ANDRITZ has received an order from Adani Green Energy Limited (AGEL), India's largest renewable energy company and a leading global player, to equip the new Tarali pumped storage plant in the Satara district of Maharashtra, India. ANDRITZ will supply pump turbines, motor generators and related electromechanical equipment.

The value of the order will not be disclosed.

India is significantly expanding its pumped storage capacity to balance the increase of variable renewable energy from solar and wind in its energy mix. AGEL's Tarali pumped storage plant, with a capacity of 1,500 MW, will make a major contribution to this expansion. This is the second contract awarded to ANDRITZ by AGEL, following the order for the 500 MW Chitravathi pumped storage plant received in 2023.

ANDRITZ's scope of supply for Tarali includes the design, manufacture, installation, testing, and commissioning of the pumped storage units along with associated auxiliaries. The project will be executed using ANDRITZ's state-of-the-art manufacturing facilities in India, supported by its global network.

The repeat order from AGEL underlines ANDRITZ's strong position in the Indian hydropower market and its expertise in delivering pumped storage solutions, which play a crucial role in ensuring grid stability and supporting the integration of variable renewable energy. ANDRITZ is currently involved in the implementation of four new pumped storage plants in India.

##### **ANDRITZ GROUP**

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

## **ANDRITZ HYDROPOWER**

ANDRITZ Hydropower is one of the world's leading suppliers of electromechanical equipment and services for hydropower stations in the dynamically growing global renewable energy market. Based on 185 years of experience and a global installed capacity of 489 gigawatts, we offer innovative solutions for new and existing hydropower stations, from small hydropower to large-scale plants. State-of-the-art digital solutions, comprehensive services for the operation and maintenance of entire hydropower plants, and turbo generators for the thermal industry complete the portfolio.
