

PRESS RELEASE

ANDRITZ receives major order for rehabilitation of Mozambique's largest hydropower plant

GRAZ/VIENNA, JULY 16, 2025. Hidroelétrica de Cahora Bassa (HCB), Mozambique's leading hydropower generation company, has awarded ANDRITZ a contract for the rehabilitation of the Cahora Bassa hydropower plant. It is the largest hydropower plant in Mozambique and one of the largest in Africa. The order value for ANDRITZ is in the mid three-digit million-euro range. It was included in ANDRITZ's order intake for the fourth quarter of 2024.

Commissioned in 1975, the 2,075 MW plant on the Zambezi River supplies more than half of Mozambique's electricity and exports significant amounts to neighboring countries. More than an energy asset, Cahora Bassa is a cornerstone of Mozambique's economic and social development. HCB's rehabilitation project, called REABSUL II, aims to enhance the efficiency, reliability, availability, and maintainability of the plant. The capacity of the turbines will be increased by more than 4% to 433 MW per unit.

ANDRITZ will supply five new state-of-the-art 480 MVA generators, five new Francis turbine runners, control and protection systems, and hydromechanical structures. The scope of the contract includes the design, engineering, manufacturing, and supply of the high-efficiency equipment, as well as installation, testing, and commissioning at the project site.

After three years of preparation work, during which the new equipment will be designed and manufactured and the site infrastructure prepared, Cahora Bassa's generating units will be replaced one by one, while ensuring the stable and constant operation of the other units. This is a major challenge, especially for the rehabilitation of the common systems, and will also require thorough coordination with the rehabilitation of the Songo Converter Substation, which HCB will carry out in parallel.

ANDRITZ is proud to contribute to this key project for the region and is committed to supporting the hydropower market in Mozambique to ensure renewable energy supply for decades to come.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ HYDROPOWER

ANDRITZ Hydropower is one of the world's leading suppliers of electromechanical equipment and services for hydropower stations in the dynamically growing global renewable energy market. Based on 185 years of experience and a global installed capacity of 489 gigawatts, we offer innovative solutions for new and existing hydropower stations, from small hydropower to large-scale plants. State-of-the-art digital solutions, comprehensive services for the operation and maintenance of entire hydropower plants, and turbo generators for the thermal industry complete the portfolio.
