CERI Technology Company awards annealing furnace contract to ANDRITZ

GRAZ, JULY 17, 2025. CERI Technology Company Limited has awarded a contract to international technology group ANDRITZ to supply an annealing furnace for a continuous galvanizing line for Hebei MFG Metallurgical Materials Technology Co., Ltd. The line will be part of MFG's precision alloy color coating industrial park project in Changzhou, Jiangsu Province, China.

CERI Technology is leading the galvanizing line project and is responsible for delivering the mechanical terminal and post-treatment sections of the line, while ANDRITZ will supply the annealing furnace section.

Designed for an annual capacity of 400,000 tons, the line will primarily produce galvanized aluminum-silicon coated steel sheets. This type of coating significantly improves corrosion resistance and provides a high-quality surface finish, making these products ideal for applications requiring enhanced durability and aesthetics, such as outer panels of home appliances and automotive components.

ANDRITZ annealing furnaces for continuous annealing and galvanizing lines have a long track record and numerous references worldwide. Key features include long radiant tube service life, high operational flexibility, precise furnace temperature control, coating stability, and excellent air tightness.

This order further strengthens ANDRITZ's position as a leading technology partner to the global metals industry and marks the beginning of a new collaboration with Hebei MFG.

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the third quarter of 2025.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ METALS

ANDRITZ Metals is – via ANDRITZ Schuler – one of the world's leading suppliers of technologies, plants and digital solutions in metal forming. The product portfolio also includes automation and software solutions, process know-how and service. In the metals processing segment, the business area offers innovative, sustainable and market-leading solutions for the production and processing of flat products, for welding systems and furnaces with its own burner solutions, as well as services for the metals processing industry.
