

## PRESS RELEASE

# BO PAPER PISA, Brazil, orders complete recycled paper stock preparation line from ANDRITZ

*GRAZ, AUGUST 20, 2025.* BO PAPER PISA has selected international technology group ANDRITZ to supply a complete recycled paper stock preparation line with a capacity of 350 tons/day for its paper mill in Jaguariaíva, in the state of Paraná, Brazil. The new OCC (Old Corrugated Containers) line is scheduled to start operations in the second quarter of 2026.

With over 40 years of experience, the BO PAPER Group is the largest producer of high-performance thermomechanical fiber papers in Latin America. Traditionally focused on the graphic and editorial markets, the company is now taking a strategic step by expanding its portfolio with packaging papers, integrating recycled fibers into its production process.

ANDRITZ's scope of supply includes:

- A complete low-consistency pulper system and an innovative reject removal system to ensure efficient disintegration of raw material with minimal fiber loss
- Cleaning, fractionation, and screening stages including *PrimeScreen* X technology with the newly developed *PrimeRotor* for high screening efficiency with lower energy consumption
- An innovative reject treatment system with a reject compactor for dewatering to the highest possible dry content, reducing the need for plastic transportation
- Supervision of assembly, commissioning, start-up, and training

From the beginning of the project, ANDRITZ has worked closely with BO PAPER, providing basic engineering to support decision-making and investment evaluation. This collaborative approach enabled the development of a tailored, robust solution aligned with BO PAPER's specific needs and strategic objectives.

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the first quarter of 2025.

This project reinforces ANDRITZ's position as a reliable and strategic partner in delivering high-performance technological solutions for the pulp and paper industry, contributing to the sector's sustainable development.

## **ANDRITZ GROUP**

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
