

PRESS RELEASE

Thailand's EGAT selects ANDRITZ to modernize Srinagarind hydropower plant

GRAZ / VIENNA, OCTOBER 27, 2025. Electricity Generating Authority of Thailand (EGAT) has awarded international technology group ANDRITZ a contract to replace the two pumped storage units at the Srinagarind hydropower plant with new, state-of-the-art units. The renewable energy project, with an order value in the mid double-digit million-euro range, is included in ANDRITZ's order intake for the second quarter of 2025.

Srinagarind, located on the Kwai Yai River in Kanchanaburi province, is one of Thailand's largest hydropower plants. With a total capacity of 720 MW from three Francis units and two pumped storage units, it provides base load electricity supply, peak load coverage, and grid balancing for Thailand's power system. In an earlier modernization project, ANDRITZ replaced the plant's Francis units.

The new contract comprises the supply, installation, and commissioning of two new 180-MW pump turbine units, motor generators, related electromechanical equipment, and auxiliaries. ANDRITZ will use its advanced manufacturing facilities in India and its global engineering network to deliver the project. This modernization will ensure efficient and reliable operation of the pumped storage units for many years to come, securing Srinagarind's role as a cornerstone of Thailand's power system.

EGAT owns and operates over 50 power plants across Thailand, with a total installed capacity of over 16,000 MW, and is also active in energy-related businesses abroad.

ANDRITZ has been active in Thailand for over five decades and has contributed to nearly half of the country's hydropower capacity through new installations and modernization projects. This repeat order from EGAT underlines ANDRITZ's strong position in the Thai hydropower market and highlights its commitment to delivering innovative, sustainable energy solutions that support Thailand's renewable energy goals.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ HYDROPOWER

ANDRITZ Hydropower is one of the world's leading suppliers of electromechanical equipment and services for hydropower stations in the dynamically growing global renewable energy market. Based on 185 years of experience and a global installed capacity of 492 gigawatts, we offer innovative solutions for new and existing hydropower stations, from small hydropower to large-scale plants. State-of-the-art digital solutions, comprehensive services for the operation and maintenance of entire hydropower plants, and turbo generators for the thermal industry complete the portfolio.
