K2 Ethanol orders ethanol and animal-feed plants from ANDRITZ

GRAZ, NOVEMBER 3, 2025. K2 Ethanol Pvt. Ltd, a pioneer in the biomass and biofuel sectors, has awarded ANDRITZ a contract to build integrated ethanol and animal-feed production plants in India. The project will include the country's first ethanol plant powered by agro-residue, supporting India's renewable energy goals and the sustainable use of agricultural residues.

The greenfield project covers an ethanol distillery with a capacity of 150,000 liters per day and an animal-feed pellet plant with a capacity of 400 tons per day. The multi-grain processing facility will address the growing local demand for both ethanol and animal nutrition. It also aligns with government policies promoting renewable energy sources, including the blending of ethanol with petrol, and more sustainable feed solutions.

"This is an important project, not just for us and the local economy, but also for national and international sustainability targets," said Rajpal Yadav, Director at K2 Group of Industries. *"As such, we knew we needed to involve ANDRITZ, with its proven track record in delivering technologies at scale, process know-how and experience of local market dynamics."*

For this prestigious project, ANDRITZ has full engineering, procurement, installation and commissioning (EPC) responsibility and will leverage its extensive experience from major capital projects in the Asia-Pacific region.

"This project shows how advanced biofuel and feed technologies can strengthen energy security and support sustainable agriculture," said Pavan Kumar Pawar, Vice President, South Asia at ANDRITZ Feed & Biofuel. *"We are proud to contribute our engineering expertise, comprehensive solutions, and global experience to help establish a new benchmark for integrated ethanol and animal-feed production in India."*

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the third quarter of 2025.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ ENVIRONMENT & ENERGY

ANDRITZ Environment & Energy is committed to environmental responsibility and offers a broad range of technologies focusing on sustainable solutions for various industries. The extensive product portfolio includes technologies for the production of green hydrogen and renewable fuels, for carbon capture and emission reduction, mechanical and thermal solid/liquid separation, grinding, pelletizing, and for pumping fluids. Complemented by cutting-edge automation and digitalization as well as comprehensive services, they enable efficient and innovative solutions in processes such as water and wastewater management, recycling, waste/sludge-to-value, resource-saving battery-related mining, desalination, feed and food valorization, air emission reduction and P2X.
