

NAF VALVES

PRODUCT OVERVIEW

ANDRITZ

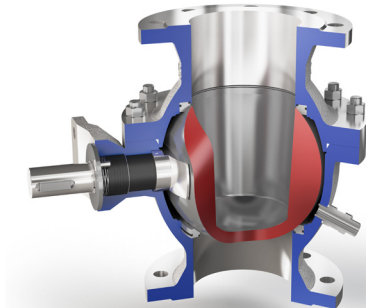

NAF Valves

Our comprehensive range of valves offers precise control over fluid flow ensuring optimal performance and efficiency in diverse industries such as pulp and paper, chemical processing, power generation, oil and gas, and water treatment.

NAF DUBALL DL

Reliable two-piece ball valve for a tight shut-off. Designed for the most demanding applications. Available with Z-trim for elimination of cavitation and noise when used for control.

NAF DUBALL DL POCKET VALVE

The NAF Duball Pocket valve is installed for safe removal of sand and finedebris out of the process as efficiently as possible while maintaining process pressure.

NAF DUBALL DL CERAMIC VALVE

Ball valve for applications with erosive and abrasive media. Designed for less maintenance and longer lifetime.

NAF TRUNNBALL DL

Metal- and soft seated trunnion-mounted ball valve suitable for control, on-off and isolation. Z-trim option for elimination of cavitation and decreased noise.

NAF TRIBALL

A cost efficient, high quality three-piece ball valve, with various connections. Available as metal seated or soft seated version.

NAF SETBALL

V-port ball sector valve with excellent control valve characteristics. With the Z-trim option, problems with cavitation and high noise levels can be avoided.

NAF SETBALL SF

NAF SETBALL FOR MC-PULP

NAF TOREX

High performance butterfly valve. Triple offset disc for tight shut-off and to eliminate seat wear.

NAF TURNEX

Heavy-duty actuator for high performance modulating control.

NAF CHECK

Tilting disc valve. Unique design provides excellent tightness and minimizes pressure shocks.

NAF PROCAP

The Capping Valve from NAF ensures safe, time saving processing of wood chips in pulp batch digesters.
