Action Tesa selects ANDRITZ for pressurized refining system in India

GRAZ, NOVEMBER 5, 2025. Action Tesa, India, has selected international technology group ANDRITZ to supply a pressurized refining system for its new medium-density fiberboard (MDF) production facility in Visakhapatnam, Andhra Pradesh. Start-up of the new system is scheduled for the second quarter of 2026.

With a capacity of 33 t/h, the pressurized refining system will significantly enhance the customer's fiber production capabilities. The heart of the system is a 20" plug screw feeder featuring state-of-the-art compression housing with AdvaProtect segments. This allows for servicing directly at the customer site without the need for a spare housing. The system also includes an S1056 refiner, a pressurized digester with counterflow and steam regulation, as well as a C-Feeder concept for enhanced material handling.

Vivek Jain, Managing Director at Action Tesa, says: *"We are excited to partner with ANDRITZ for our new MDF line. Its reputation for delivering reliable, high-performance fiber processing systems made it the ideal choice for this important project. We look forward to a successful collaboration and a smooth start-up in 2026."*

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the third quarter of 2025.

Action Tesa is a well-established brand in the Indian building materials sector, known for its commitment to quality, innovation, and sustainable growth.

– End –

ANDRITZ has received an order from Action Tesa to supply a pressurized refining system.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
