

PRESS RELEASE

Thailand's EGAT awards ANDRITZ an order to modernize the Rajjaprabha hydropower plant

GRAZ / VIENNA, NOVEMBER 6, 2025. The Electricity Generating Authority of Thailand (EGAT) has selected international technology group ANDRITZ to modernize the Rajjaprabha hydropower plant. ANDRITZ will renovate all three 80-MW generating units of the plant. The renewable energy project, with an order value in the mid double-digit million-euro range, is included in ANDRITZ's order intake for the third quarter of 2025.

The Rajjaprabha plant on the Saeng River in Ban Ta Khun district, Surat Thani Province, has been operating since 1987. This modernization will ensure efficient and reliable operation for decades to come. The scope of the contract comprises the complete modernization of Units 1-3 including generator and specified turbine components along with installation supervision, testing, and commissioning.

EGAT owns and operates over 50 power plants across Thailand, with a total installed capacity of over 16,000 MW. The utility recently also awarded ANDRITZ a major modernization contract for the Srinagarind hydropower plant.

ANDRITZ has been active in Thailand for over five decades and has contributed to nearly half of the country's hydropower capacity through new installations and modernization projects. This latest order is another milestone in the long-standing cooperation with EGAT and further strengthens ANDRITZ's position in the Thai hydropower market, supporting the country's efforts to ensure a reliable supply of sustainable, renewable energy.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ HYDROPOWER

ANDRITZ Hydropower is one of the world's leading suppliers of electromechanical equipment and services for hydropower stations in the dynamically growing global renewable energy market. Based on 185 years of experience and a global installed capacity of 492 gigawatts, we offer innovative solutions for new and existing hydropower stations, from small hydropower to large-scale plants. State-of-the-art digital solutions, comprehensive services for the operation and maintenance of entire hydropower plants, synchronous condenser systems for grid stability, and turbo generators for the thermal industry complete the portfolio.
