

## PRESS RELEASE

# Dong Tien, Vietnam, successfully starts up its third ANDRITZ OCC line

**GRAZ, FEBRUARY 10, 2026.** Dong Tien-Long An Paper JSC has successfully started up a recycled fiber line at its board production mill in Tay Ninh Province, Vietnam. This new OCC (old corrugated containers) line, the third supplied by international technology group ANDRITZ, is designed to process 330 t/d of mixed OCC for the production of high-quality testliner serving both domestic and export markets. The addition of this third line is a strategic step that increases Dong Tien's production capacity, further enhances pulp quality, and strengthens its commitment to sustainable growth and operational excellence.

ANDRITZ supplied the complete OCC line, including the pulping system, cleaning, screening, thickening, and a dispersing system for long fibers. The line features state-of-the-art technology such as the *PrimePulping* LC system with an innovative design for minimal fiber loss during pulping and efficient reject removal, as well as the *PrimeScreen* X equipped with patented rotor foils for maximum screening efficiency and reduced energy consumption.

Hoang Trung Son, Chairman, Dong Tien-Long An Paper JSC, says: *"This line's successful start-up demonstrates the exceptional teamwork between Dong Tien and ANDRITZ. Our long-standing partnership delivers tangible results by combining ANDRITZ's technical leadership with our operational excellence. This is why ANDRITZ remains our partner of choice."*

The collaboration between Dong Tien and ANDRITZ goes beyond technology supply; it reflects a shared commitment to innovation, environmental responsibility, and long-term competitiveness. Building on nearly two decades of cooperation, this project reinforces mutual trust and sets the stage for future initiatives that will further advance recycling capabilities and reduce the industry's carbon footprint.

Dong Tien-Long An Paper JSC is part of Dong Tien Packaging and Paper, one of the pioneers in wastepaper recycling in Vietnam and a major player in the paper industry, dedicated to producing quality paper products. The mill is located at Lot A216–A218, Street No. 2, Thai Hoa IP, Tan Hoa Hamlet, Duc Lap Ward, Tay Ninh Province, Vietnam.

## **ANDRITZ GROUP**

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
