Suzano selects ANDRITZ to modernize electrostatic precipitators at pulp mill in Aracruz, Brazil

GRAZ, JULY 3, 2026. Suzano, a leading global pulp producer, has awarded international technology group ANDRITZ a contract to modernize electrostatic precipitators (ESPs) of recovery boilers at its Aracruz plant in Espírito Santo, Brazil.

The order is included in ANDRITZ's order intake for the fourth quarter of 2025.

The contract covers the complete upgrade of five ESPs for recovery boilers A and C. ANDRITZ will supply new Switched Integrated Rectifier (SIR) technology, replace the precipitators' internals, install new ash handling systems, and provide other electromechanical installation services.

This modernization will ensure high reliability and availability of the ESPs. In addition, the improved ESP performance will allow Suzano to recover and recycle more valuable chemicals and maintain emission levels within applicable limits. This supports the company's goals for efficient and sustainable operations.

The start-up of the last upgraded precipitator is scheduled for the second quarter of 2027.

The project once again demonstrates ANDRITZ's expertise in ESP modernization using state-of-the-art technologies, as well as Suzano's commitment to maintaining environmental performance. It also reinforces the long-standing partnership between the two companies and highlights their shared focus on operational efficiency, reliability, and sustainability.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ ENVIRONMENT & ENERGY

ANDRITZ Environment & Energy is committed to environmental responsibility and offers a broad range of technologies focusing on sustainable solutions for various industries. The extensive product portfolio includes technologies for the production of green hydrogen and renewable fuels, for carbon capture and emission reduction, mechanical and thermal solid/liquid separation, grinding, pelletizing, and for pumping fluids. Complemented by cutting-edge automation and digitalization as well as comprehensive services, they enable efficient and innovative solutions in processes such as water and wastewater management, recycling, waste/sludge-to-value, resource-saving battery-related mining, desalination, feed and food valorization, air emission reduction and P2X.
