

PRESS RELEASE

Minhan Paper places repeat order with ANDRITZ for a new OCC line in Vietnam

GRAZ, JULY 10, 2026. Minhan Paper Joint Stock Company has placed an order with ANDRITZ to supply a complete old corrugated containers (OCC) recycling line for its mill in Hung Yen province, Vietnam. This marks the company's second OCC line from ANDRITZ and supports Minhan Paper's ongoing expansion in packaging paper production. Start-up is scheduled for the first half of 2027.

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the second quarter of 2026.

The new ANDRITZ OCC line will provide a fully integrated solution covering the entire process from pulping to refining. The scope of supply comprises low-consistency pulping with an ANDRITZ FibreSolve pulper, multi-stage screening and cleaning, reject dewatering, a paper machine approach system, a broke handling system, and a disc filter saveall system for white water treatment and fiber recovery. The line is designed to enhance fiber recovery, operational efficiency, and resource utilization. It will ensure stable operation, high impurity-removal efficiency, and low fiber loss, supporting more sustainable recycled fiber processing.

The line will produce high-quality corrugating medium with a capacity of 700 t/d. The broke handling system will have a capacity of 100 t/d.

"We were very satisfied with the performance and stability of our first OCC line from ANDRITZ, which gave us the confidence to once again select ANDRITZ for the new line. We look forward to achieving similar success with this line as we continue to expand our production capabilities," said Vu Hoang, Director of Minhan Paper.

This repeat order underscores Minhan Paper's trust in ANDRITZ technology and further strengthens the long-standing collaboration between the two companies.

Minhan Paper Joint Stock Company, founded in 2020 and headquartered in Hung Yen province, Vietnam, is a private paper manufacturer specialising in corrugated paper, paperboard, and containerboard products. The company operates in the rapidly growing packaging sector, supplying materials such as testliner and corrugating medium. Through continuous investment in modern paper production technologies, Minhan Paper aims to strengthen its market position and support sustainable growth in Vietnam's packaging industry.

– End –

ANDRITZ receives a repeat order from Minhan Paper for another OCC line.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
