ModuScreen TD

**RECYCLED FIBER SCREENING FOR
BROWN GRADES WITH HIGH FLAKE CONTENT**

The ModuScreen TD is part of the highly successful ModuScreen family of ANDRITZ pressure screens and is a continuously operating sorter which handles screening, deflaking, fiber recovery and reject dewatering in one compact unit. The design fea-

tures highest deflaking efficiency to minimize fiber losses, especially when processing brown grades such as OCC. The screen is usually used in screening systems for the following recycled fiber applications:

- As tailing screen in coarse screening systems
- As single coarse screen in low-capacity lines
- As intermediate screen for deflaking in fine screening systems

ANDRITZ

ENGINEERED SUCCESS

Superior screening, deflaking and fiber recovery

BENEFITS:

- Four functions in one unit:
- Efficient screening for various applications and a wide range of furnishes
- Superior deflaking to minimize fiber losses
- Excellent fiber recovery
- Reject dewatering to a dryness of up to 30%
- Easily accessible for maintenance thanks to the drive being located at the bottom
- Internal parts provided with wear protection

The ModuScreen TD is available in two sizes, featuring installed power up to 110 kW.
