

PRESS RELEASE

ANDRITZ continuous galvanizing line at BlueScope Steel produces first galvanized coil

GRAZ, OCTOBER 13, 2026. International technology group ANDRITZ has achieved a major milestone at BlueScope Steel Limited's new continuous galvanizing line in Sydney, Australia, with the production of the first galvanized coil on August 3, 2026. This marks the transition from commissioning to production and an important step toward project completion and performance testing.

The line strengthens BlueScope Steel's domestic manufacturing capabilities, helping the company meet growing market demand for high-quality coated steel products. It is designed to produce galvanized steel strip for a wide range of building, construction, manufacturing, and industrial applications.

ANDRITZ supplied the process equipment, automation systems, and electrical equipment and provided engineering, commissioning, and start-up services. Key ANDRITZ technologies include a skin-pass mill, a tension leveler, coaters, a direct-fired furnace, and electric radiant tube heating technology (Green CGL). Together with the advanced automation systems, these technologies enable high product quality and operational flexibility as well as energy-efficient and reliable production.

The new continuous galvanizing line is designed to process steel strip with widths of up to 1,325 mm and thicknesses ranging from 0.30 to 1.00 mm at process speeds of up to 160 m/min. It has a nominal annual production capacity of 240,000 metric tons.

BlueScope Steel Limited, headquartered in Australia, is a leading international steel products company with operations across Australia, New Zealand, North America, and Asia.

– End –

BlueScope Steel Limited and ANDRITZ project teams celebrating the successful production of the first galvanized coil at the new continuous galvanizing line in Sydney, Australia.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.

As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ METALS

ANDRITZ Metals is one of the world's leading suppliers of technologies and plants for metal forming and processing, complemented by comprehensive automation and digitalization solutions as well as lifecycle services. The product portfolio comprises advanced ANDRITZ Schuler press systems for all areas of metal forming as well as innovative technologies for battery production, including cell assembly, cell finishing, and testing. In the area of metal processing, ANDRITZ offers innovative, sustainable and market-leading solutions for the production of flat products, as well as welding systems, furnaces, burner technologies, and induction heating solutions.
