PRESS RELEASE

ANDRITZ receives first winder order in South Korea from Jeonju Paper

GRAZ, NOVEMBER 17, 2026. ANDRITZ has received an order from Jeonju Paper Corporation, South Korea, to supply a *Prime*E-Wind P100 winder for containerboard for the company's PM5 production line. This is the first winder order for ANDRITZ in South Korea, marking an important milestone in the company's expansion in the Asian packaging paper market. Start-up is planned for the third quarter of 2027.

The value of the order will not be disclosed. It is included in ANDRITZ's order intake for the third quarter of 2026.

ANDRITZ will supply a state-of-the-art winding solution designed for high productivity, reliable operation, and excellent roll quality. The winder will have a working width of 8,050 mm and a design speed of 2,500 m/min. Equipped with advanced automation and intelligent features, it will help Jeonju Paper optimize production processes and enhance operational efficiency.

Shim Cheol-sik, President and CEO of Jeonju Paper Corporation, said: *"The PM5 winder project represents an important investment in strengthening Jeonju Paper's production capabilities and competitiveness. We selected ANDRITZ not only for its advanced winding technology but also for its extensive global experience and proven project execution capabilities. We are confident that the new winder will further enhance our operational efficiency and product quality and support our long-term growth strategy."*

Liu Changchun, Managing Director of ANDRITZ (Shanghai) Paper Technology Co., Ltd., added: *"We are honored that Jeonju Paper has selected ANDRITZ for this project. Drawing on our extensive global experience in high-speed, wide-width winders, we will provide Jeonju Paper with an efficient and reliable solution and fully support the successful implementation of the project. We look forward to building a long-term partnership with Jeonju Paper."*

Founded in 1965 and headquartered in Jeonju, South Korea, Jeonju Paper Corporation is one of the country's leading paper manufacturers. The company produces newsprint, corrugating medium, and recycled kraft paper grades for domestic and international markets.

ANDRITZ GROUP

International technology group ANDRITZ provides advanced plants, equipment, services, and digital solutions for a wide range of industries, including pulp and paper, metals, hydropower, environmental, and others. Founded in 1852 and headquartered in Austria, the publicly listed group employs about 30,000 people at 280 locations in over 80 countries.
As a global leader in technology and innovation, ANDRITZ is committed to fostering progress that benefits customers, partners, employees, society, and the environment. The company's growth is driven by sustainable solutions enabling the green transition, advanced digitalization for highest industrial performance, and comprehensive services that maximize the value of customers' plants over their entire life cycle. ANDRITZ. FOR GROWTH THAT MATTERS.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
