ANDRITZ CDH HORIZONTALLY FED DRUM CHIPPER

High-performance chipping and effortless operation

The ANDRITZ horizontally fed drum chipper (CDH) combines proven chipping technology with a horizontal feed design to deliver consistent chip quality, enhanced operational safety, and easy maintenance. Compact, efficient, and operator-friendly, it provides reliable high-performance chipping for demanding wood processing applications.

ANDRITZ CDH horizontally fed drum chipper

FEATURES

- Capacity range: 50-200 sub m^3/h
- Width range: 1,000-1,200 mm
- Suitable for all main wood species (softwood, hardwood, tropical hardwood), slabs, and similar materials
- Maximum infeed opening: 350 mm
- Typical wood length: 1,000-5,000 mm
- Available with the ANDRITZ TurnKnife system or conventional re-grindable knives

Chipper rotor equipped with TurnKnife TK-IV knife system

BENEFITS

- Easy maintenance with direct access to all service points
- Built-in safety features help protect the chipper from major damage
- High and consistent chip quality
- Low maintenance requirements maximize uptime
- Debris removal as an optional feature for added reliability
- Safe and operator-friendly design
- Suitable for all main wood species
