**MACHINE DATA**

Machine type	CENSOR <sup>®</sup> recycling system CZ 2.1-2
Material of product wetted parts	1.4462
Material of seals	PTFE, Viton
Leading dimensions ( L x W x H)	3400 x 1800 x 1100 mm
Bowl diameter	420 mm
Permissible rotational speed	3400 rpm
Total Weight	3300 kg

**EQUIPMENT AND ACCESSORIES**

Feed pipe, gearbox, vibration monitor, spring damper elements, documentation

**ELECTRICAL DATA**

Main drive	30 kW (ATEXconform )
Scroll drive	15 kW (ATEXconform ) with external driven fan
Control unit	upon request

**PROCESS DATA**

Product feed	Depending on particle size and density e.g. ~ 400 - 500 kg/h pre-shredded plastic flakes or films (dry, at bulk density of 100g/l)
Application	The CENSOR <sup>®</sup> system has been designed for the process, separation and washing of (waste) plastics fractions of different densities.
