

# Pilot Test Facilities of ANDRITZ Fließbett Systeme GmbH

## Possibilities of our pilot and test plants:

### Products:

- solutions, suspensions, pastes, filter cake (dry sludge), bulk solids

### Capacity:

- over 2,100 tested products in lab and pilot scale
- development of components and processes
- production of product samples

### Operation mode:

- open operation
- gas loop with total condensation (also under closed loop respectively oxygen reduced conditions)
- steam loop with partly condensation
- solid add-back

### Apparatus configuration:

- with in-bed heat exchangers
- with internal milling for grain variability
- many air distribution plates available
