

Tailored automation solutions

For optimal efficiency in plant operations

Whatever your solid/liquid separation equipment or system, there's a tailored control solution that can reduce power consumption, improve process performance, and give your operators better safety and control. At ANDRITZ SEPARATION, we have the expertise to design, program, build, and configure it.

Thanks to our worldwide network of automation engineers, we provide local or remote services and support for the complete range of process needs during the entire life time of

your assets. All scalable from single machines up to plant-wide installations, efficiently optimized by a single supplier, and always individually tailored to your business demands.

Take advantage of our 150 years of OEM experience gained from an installed base of more than 55,000 machines. Let our global team of solid/liquid separation specialists help you improve safety, reduce costs, and save on power – for a vast number of well-known OEM brands.

Automation

Automation tools to improve processes and plants, both technically and economically

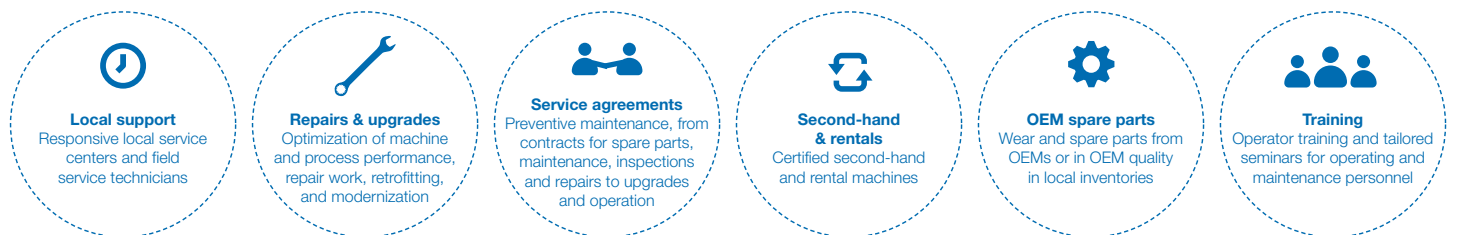

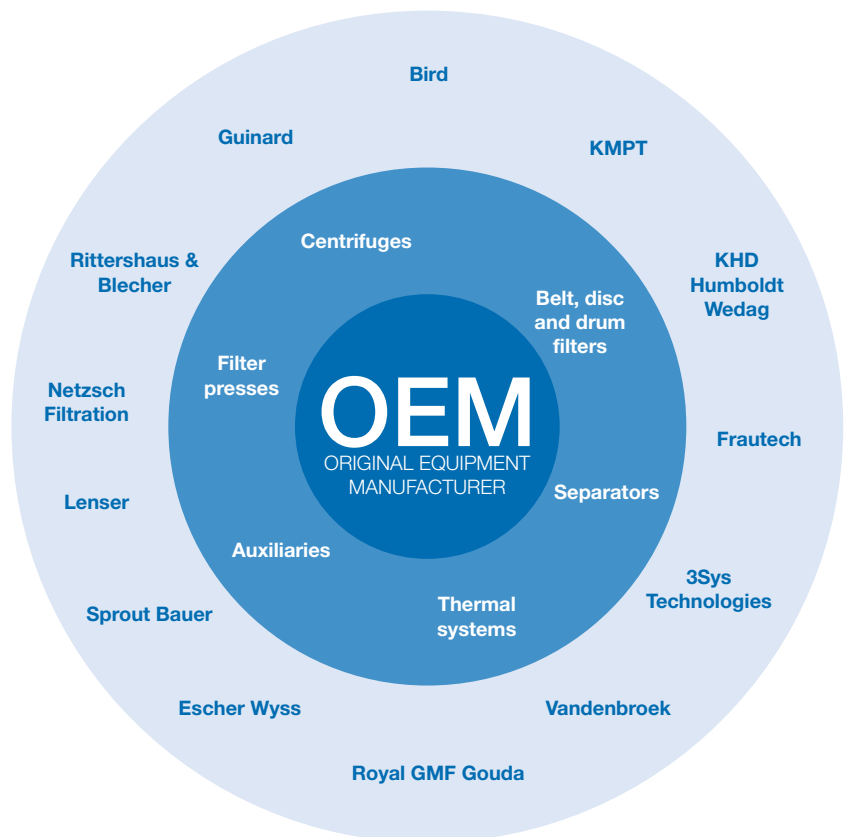

Always OEM quality

Local support backed by global expertise

Our service philosophy is simple: One phone call, one contact person, one dedicated team that speaks your language and knows your equipment and process. This is not an empty promise. It is backed by 150 years of experience, a network of 550 service specialists for solid/liquid separation equipment and systems as well as service centers all around the world.

A true full-service provider

Whether you need spare parts, rentals, local service, repairs, upgrades, or modernization of your equipment, ANDRITZ SEPARATION is a 360-degree service partner. From initial consulting through to service agreements, plant optimization, automation, and training programs, we are always looking for ways to minimize downtime and increase predictability in operations while raising your overall production efficiency. In short, we've got you covered.
